

API PROJECT

API CHOSEN: Musixmatch API

(<https://developer.musixmatch.com/documentation/api-methods>)

FUNCTION: Reads objects from Musixmatch lyrics database

CONCEPT: Interactive Type based on Music Search

EXAMPLE: "I want to find Billie Holiday's top 3 songs."

HOW CAN I HELP YOU TODAY?

Billie Holiday top 3 songs |

EXAMPLE: "I want to find Billie Holiday's top 3 songs."

SUMMERTIME

GLOOMY SUNDAY

STRANGE FRUITS

EXAMPLE: "I want to find the lyrics to "All of Me" by Billie Holiday

HOW CAN I HELP YOU TODAY?

All Of Me lyrics |

EXAMPLE: "I want to find the lyrics to "All of Me" by Billie Holiday

All of me

Why not take all of
me

Can't you see

I'm no good without

HOW IT WORKS: Musixmatch API has several input parameters such as `'chart.tracks.get'`, `'track.lyrics.get'`, and `'artist.related.get'` that use Musixmatch's databses

I will be using those input parameters to retrieve data, such as the lyrics of a particular song, or related artists. I will then log this information and display the text in an interactive way.
